

AKHIL KUMAR MUDIGONDA

UI/UX Designer | Product Designer | Web Designer

United States | Email | (602) 705-2683 | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Strategic and data-informed Senior Product Designer with 7+ years of experience leading user-centered design initiatives across enterprise SaaS, e-commerce, and AI-driven platforms. Expert in architecting scalable, tokenized design systems in Figma, conducting mixed-methods user research, and deploying WCAG-compliant design strategies that boost product engagement and system usability. Proven track record of collaborating with cross-functional engineering pods to automate handoff workflows, improve product discovery, and drive measurable conversion rate optimizations (CRO) that yield multi-million-dollar revenue impacts.

SKILLS

Product Strategy & Design: End-to-End Product Design, User Research (Qualitative & Quantitative), Wireframing, High-Fidelity Prototyping, Information Architecture, Service Blueprints, Persona Development, Customer Journey Mapping, Interaction Design, Growth Design, Mobile & Responsive Web Design.

UX Design: UX Audits, Conversational Interfaces, AI-Driven UX, Data Visualization, Enterprise SaaS UX, User Personas, Site Mapping, Motion Design, Empathy Mapping, Typography, Color Theory, Use Cases, Agile UX.

Specialized Methodologies: Component Governance, Figma Variables & Tokenization, Design Thinking, Usability Testing, Heuristic Evaluation, Accessibility Testing (WCAG 2.1/2.2 AA Compliance), A/B Testing & Experimentation, Motion & Micro-interactions.

Design & Collaboration Tools: Figma, ProtoPie, Sketch, Miro, Adobe Creative Suite (Illustrator, Photoshop, XD, InDesign, After Effects), InVision, Lottie, Framer, Balsamiq, Notion, Jira, Confluence.

Product & Analytics: Google Analytics, Amplitude, Hotjar, CMS Platforms (WordPress, Adobe Experience Manager/AEM), Slack.

Technical Literacy: Front-End Layout (HTML5, CSS3, JavaScript ES6), Flexbox/Grid Architecture, Resilient Responsive Breakpoints.

PROFESSIONAL EXPERIENCE

Kroger, United States

February 2026 – Present

Senior Product Designer

- Architected and scaled a centralized enterprise design system in Figma using component variables and semantic tokens, cutting cross-functional design-to-development handoff cycles by 40%.
- Conducted rigorous A/B and multivariate experimentation testing on the digital check-out funnel via Amplitude analytics, refining interaction touchpoints to capture \$2.5M in projected annual revenue.
- Led a comprehensive accessibility overhaul of the flagship e-commerce application to ensure strict WCAG 2.2 AA compliance, increasing usability metrics by 25% for assistive technology users.
- Designed high-throughput internal logistics tracking interface, implementing advanced data visualization layouts that compressed 1M+ daily complex inventory updates into scannable, actionable dashboards.
- Directed co-creation and user journey mapping sprints with 50+ key corporate business units, converting qualitative research observations into friction-free user flows that boosted monthly active user (MAU) interaction metrics.

AriesView, United States

October 2025 – December 2025

Associate Software Engineering Intern (UI/UX / Product Design)

- Transformed highly abstract, 50,000+ node datasets into simplified relational data visualization interfaces, reducing cognitive load metrics and increasing data-analyst task performance speeds by 28%.
- Facilitated targeted context inquiries and contextual mapping sessions with 40 domain specialists, conducting multi-point heuristic audits to mathematically validate and iterate upon automated AI insights.
- Programmed highly accurate interactive application prototypes utilizing Figma and ProtoPie, defining conditional logic and complex micro-animations to map out exact front-end browser performance behaviors.
- Documented and integrated 50+ new accessible UI components into the core design system repository, standardizing typography and style hierarchies to reduce production layout variances by 20%.

Citus Infotech, India

October 2022 – November 2023

Product Designer

- Engineered conversational flows for an enterprise AI assistant, configuring natural language intent maps and automated query routing states to deflect low-tier client troubleshooting volume by 30%.

- Restructured core navigation models for a multi-tenant B2B SaaS system, deploying Framer behavioral prototypes to compress platform onboarding paths and elevate client annual retention rates by 15%.
- Spearheaded the responsive system redesign of high-traffic corporate web properties managed via WordPress and AEM, using flexbox-grid mechanics to increase session lengths by 45% while driving bounce rates below 20%.
- Pioneered multi-tier heuristic evaluations on dated industrial operations software, using Miro journey mapping to eliminate 15 high-friction workflow gaps and streamline end-to-end task flows.
- Integrated micro-animations into system state transitions using Adobe After Effects and Lottie, establishing high-fidelity visual confirmation loops that elevated perceived system speeds by 22%.

OnDevice IT Solutions, India

July 2021 – October 2022

UI/UX Designer

- Designed information layouts for technical telemetry web products using Sketch and InVision, configuring multi-layered analytical charts that scaled enterprise operational speed parameters by 35%.
- Translated engineering specifications into low-and-high-fidelity interactive wireframes, establishing structured navigation trees that minimized customer time-to-onboard by 40%.
- Managed continuous, recursive digital usability validation testing tracks with 500+ active enterprise professionals, tracking interaction metrics to implement layout optimizations that increased call-to-action engagement by 18%.
- Authored and governed comprehensive product typography rules and structural patterns, supplying cross-functional global dev teams with clean web UI kits to accelerate feature release vectors by 25%.

DevRabbit IT Solutions, India

October 2020 – June 2021

UI/UX Designer

- Supervised discovery research tracks and remote user testing panels, converting raw screen recordings into analytical insights to structurally justify high-priority iterative feature updates.
- Developed application layouts, cross-platform wireframes, and interactive click-through prototypes using Adobe XD, converting functional platform parameters into tested, high-fidelity consumer interfaces.
- Facilitated cross-functional design thinking workshops with external corporate partners, leveraging collaborative empathy maps to align aesthetic deliverables with fundamental commercial bottom-line outcomes.

Informative Web Solutions, India

May 2017 – September 2020

UI/UX Designer

- Designed and deployed responsive web interfaces for 15+ digital retail applications, configuring streamlined product exploration and carting paths that drove average order value (AOV) metrics up by 12%.
- Authored platform-agnostic fluid layouts for smartphone devices, enforcing strict adherence to Apple Human Interface Guidelines and Material Design definitions to generate a 30% surge in mobile transaction conversions.
- Re-architected structural sitemaps and indexing structures for an enterprise educational repository portal, compressing total user navigation pathways from 5 down to 3 essential actions.

EDUCATION

Master's in User Experience

January 2024 – December 2025

Arizona State University, Tempe, Arizona

Bachelor's in Computer Science & Engineering

October 2013 – April 2017

Chalapathi Institute of Engineering & Technology, Guntur, India

PROJECTS

- **Living Systematic Review (LSR) Interface (Mayo Clinic / ASU):** Designed AI-assisted research and data exploration workflows to improve clarity and reduce cognitive load.
- **Mesa Natural Gas Awareness Survey (City of Mesa / ASU):** Translated complex public-safety data into accessible, user-friendly survey experiences.
- **GO Yatra Mobile App:** Designed for pilgrim travel services and onboarding, discovery, and sharing flows to support user engagement and repeat usage.
