

AKHIL KUMAR MUDIGONDA
SENIOR PRODUCT DESIGNER

Email: akhilkumarsview@gmail.com

Portfolio link: akuxdesigns.com

LinkedIn: [linkedin.com/in/akhil-kumar-mudigonda/](https://www.linkedin.com/in/akhil-kumar-mudigonda/)

Phone: (913) 535-6715

PROFESSIONAL SUMMARY:

- Accomplished **Senior Product Designer** with 8+ years of extensive expertise in delivering end-to-end product design solutions that balance business objectives, user needs, and technical feasibility across enterprise applications.
- Proven experience leading enterprise product design initiatives by establishing scalable design systems, interface standards, and consistent user experience strategies for complex digital products.
- Strong background in defining product vision, translating strategic business goals into actionable design solutions, and supporting product roadmaps through customer-focused design practices.
- Expertise in **Human-Centered Design** methodologies, conducting user research, usability evaluations, and behavioral analysis to create intuitive and engaging digital experiences.
- Highly skilled in **UX strategy** development, aligning customer expectations with business priorities while improving usability, accessibility, and overall **product effectiveness**.
- Extensive experience designing user journeys, user flows, personas, journey maps, and information architecture to simplify complex workflows and enhance customer engagement.
- Proficient in planning and executing usability testing, heuristic evaluations, cognitive walkthroughs, accessibility reviews, and **UX audits** to continuously improve product quality.
- Experienced in creating high-fidelity user interfaces, interactive prototypes, wireframes, and visual design specifications using industry-standard design tools and collaborative workflows.
- Strong capability in establishing **Design Governance frameworks**, maintaining design quality standards, review processes, documentation practices, and scalable design operations.
- Demonstrated leadership in mentoring design teams, conducting design critiques, reviewing deliverables, and promoting best practices that improve organizational design maturity.
- Skilled in **Product Lifecycle** Management, supporting product development from concept validation through production readiness while ensuring alignment with business objectives.
- Experienced in Product Portfolio Planning, feature prioritization, product benchmarking, and innovation management to maximize business value and long-term product success.
- Strong understanding of systems thinking, enabling the design of scalable, interconnected product experiences while improving maintainability and functional consistency.
- Proficient in collaborating with cross-functional teams, **business stakeholders**, product managers, developers, and executive leadership to drive successful product outcomes.
- Adept at facilitating workshops, stakeholder discussions, design reviews, requirement gathering sessions, and strategic planning meetings to achieve alignment across project teams.
- Extensive experience preparing comprehensive design documentation, interaction specifications, process flows, feature maps, and implementation guidelines for development teams.
- Hands-on expertise with **Figma, Sketch, Axure RP, Adobe Creative Suite, Proto.io, Principle, Framer, Webflow, Balsamiq, Miro, Lucidchart, Origami Studio, and Abstract** for designing modern digital experiences.
- Strong knowledge of responsive web design principles, **HTML, CSS, JavaScript, jQuery**, cross-browser compatibility, accessibility standards, and front-end collaboration practices.
- Experienced in applying visual design principles including typography, color theory, layout consistency, visual hierarchy, and branding to create polished, user-friendly interfaces.

TECHNICAL SKILLS:

Product Design	Product Design, Product Vision Planning, Product Lifecycle Management, Product Portfolio Planning, Experience Strategy, Innovation Management
UX Strategy & Research	User Research, Human-Centered Design, User Personas, User Flows, Journey Mapping, Information Architecture, Feature Mapping
UX Evaluation	Usability Testing, Heuristic Evaluation, Cognitive Walkthrough, UX Auditing, Experience Auditing, Accessibility Review, Tree Testing, Card Sorting
Interaction Design	Interaction Design, Wireframing, Prototyping, Micro-interactions, Motion Design, Responsive Design
Design Leadership	Design Leadership, Design Governance, UX Governance, Design Operations DesignOps, Design Review Management, Release Readiness Review
Design Systems	Design Systems, Design Documentation, Visual Consistency, Interface Standards, Component Libraries, Style Guides
UI Design Tools	Figma, Sketch, Adobe XD, Axure RP, Balsamiq Mockups, Proto.io, Principle, Framer, Origami Studio

Visual Design Tools	Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Adobe Acrobat Pro
Collaboration Tools	Miro, Lucidchart, Abstract, Microsoft Visio
Front-End Technologies	HTML, CSS, JavaScript, jQuery
Web Design	Responsive Web Design, Cross-Browser Compatibility, Image Optimization, Adobe Dreamweaver

PROFESSIONAL EXPERIENCE:

Client: Kroger, Cincinnati, Ohio
Role: Senior Product Designer
Responsibilities:

Sep 2025 - Present

- Spearheaded **Enterprise Product Design** initiatives by defining scalable interface standards, establishing consistent design principles, and delivering intuitive digital experiences that aligned with complex business objectives.
- Directed Product Vision Planning activities by translating strategic business goals into actionable design initiatives, ensuring product evolution remained aligned with organizational priorities and customer expectations.
- Developed **Design Leadership** by mentoring design teams, reviewing deliverables, establishing quality benchmarks, and promoting best practices that strengthened overall product design maturity.
- Optimized organizational design practices through **UX Governance**, defining review procedures, usability standards, and compliance guidelines that ensured consistent user experiences across enterprise applications.
- Established structured design controls using Design Governance, creating approval workflows, documentation standards, and quality checkpoints that improved design consistency throughout project lifecycles.
- Managed organizational design processes through **Design Operations** DesignOps, optimizing resource planning, workflow efficiency, design asset organization, and collaboration practices across multiple product initiatives.
- Designed end-to-end **Product Lifecycle Management**, coordinating design activities from concept validation through production readiness while maintaining alignment with evolving business requirements.
- Implemented strategic Product Portfolio Planning, evaluating product opportunities, balancing design investments, and supporting prioritization decisions that maximized long-term business value.
- Maintained organizational growth through **Innovation Management**, identifying opportunities for emerging design approaches and introducing practical improvements that enhanced product competitiveness.
- Defined long-term experience direction using Experience Strategy, establishing measurable design objectives that improved customer satisfaction and strengthened product usability.
- Analyzed **Human-Centered Design** methodologies to ensure every design decision reflected real user needs, behavioral insights, and accessibility considerations throughout the product development process.
- Leveraged Systems Thinking to evaluate interconnected product components, identifying design dependencies and recommending structured solutions that improved overall product coherence and maintainability.
- Facilitated collaborative planning through Workshop Facilitation, leading structured design discussions, decision-making sessions, and requirement alignment meetings with **business stakeholders**.
- Built executive communications using Executive Stakeholder Management, presenting design recommendations, communicating project progress, and securing strategic approvals for major product initiatives.
- Conducted comprehensive **Product Benchmarking** by evaluating competing products, documenting comparative findings, and recommending enhancements that strengthened product differentiation within the market.
- Performed detailed **Experience Auditing** to assess usability effectiveness, identify experience gaps, and recommend actionable improvements that enhanced user engagement across enterprise applications.
- Directed Design Review Management by organizing formal design evaluations, validating deliverables against organizational standards, and ensuring consistent quality before implementation approvals.
- Executed **Release Readiness Review** activities by validating completed design deliverables, confirming documentation accuracy, and ensuring interface quality met established release standards before product deployment.

Client: McKesson, Irving, TX
Role: Product Designer
Responsibilities:

Oct 2024 - Aug 2025

- Utilized **Figma** to create detailed product interface designs, maintaining organized design files, reusable components, and scalable layouts that supported efficient design collaboration and future enhancements.
- Produced interactive product experiences using Framer, demonstrating realistic user interactions and interface behaviors that enabled effective design reviews and stakeholder evaluations.
- Created advanced interaction models through Origami Studio, developing motion-rich prototypes that accurately represented intended product functionality before implementation.
- Built **browser-based interface** demonstrations with **Webflow**, transforming approved product designs into responsive visual prototypes for functional validation and presentation purposes.
- Prepared professional product presentations using **Adobe InDesign**, organizing design concepts, product documentation, and visual assets into structured layouts for business reviews.

- Maintained design documentation with **Adobe Acrobat Pro**, reviewing annotated specifications, managing document revisions, and distributing finalized product design deliverables.
- Developed collaborative planning sessions through Miro, creating visual workspaces that captured product ideas, workflows, and structured design discussions for project teams.
- Implemented process flows using **Lucidchart**, illustrating product workflows, decision points, and operational sequences that improved understanding of feature functionality.
- Managed version-controlled design assets within Abstract, tracking design revisions, reviewing updates, and maintaining consistent product design history across project iterations.
- Designed detailed process diagrams using **BPMN**, documenting business activities and operational workflows to improve clarity during product planning and functional discussions.
- Obtained **Value Proposition Canvas** to define customer needs, product benefits, and value drivers that strengthened feature planning and product positioning activities.
- Prepared comprehensive **Business Model Canvas** documentation, outlining business objectives, customer segments, value propositions, and operational considerations supporting product initiatives.
- Established organized **Feature Mapping** documentation by categorizing product capabilities into logical functional groups that simplified requirement analysis and release planning.
- Optimized completed interfaces through Accessibility Review, verifying compliance with accessibility guidelines and identifying improvements that enhanced usability for diverse user groups.
- Standardized product visuals by maintaining Visual Consistency across screens, ensuring uniform application of spacing, alignment, interface elements, and design conventions.
- Conducted structured **Design Critique** sessions by evaluating product interfaces, documenting constructive observations, and recommending practical improvements that enhanced overall design quality.

Client: On Device IT Solutions, Hyderabad, India

Aug 2020 - Nov 2023

Role: UI/UX Designer

Responsibilities:

- Conducted comprehensive **User Research activities** by gathering user feedback, observing behavioral patterns, and documenting usability findings to establish user-centered design requirements for digital products.
- Developed detailed User Personas representing key audience segments, capturing user goals, motivations, behaviors, and pain points to guide design decisions throughout the product lifecycle.
- Managed complete application navigation using User Flows, defining logical task sequences and decision paths that streamlined user interactions and minimized unnecessary navigation complexity.
- Prepared **visual Journey Mapping** documentation to illustrate end-to-end customer experiences, identifying interaction stages and opportunities for improving overall user satisfaction.
- Facilitated Card Sorting exercises with representative users to organize application content into intuitive categories that improved navigation structures and information discoverability.
- Performed Tree Testing sessions to evaluate navigation effectiveness, measuring users' ability to locate information efficiently and refining content hierarchies based on observed results.
- Executed structured **Heuristic Evaluation** assessments by reviewing interface designs against established usability principles and documenting recommendations for improving consistency and user experience.
- Implemented **Cognitive Walkthrough** methodology to examine task completion processes, identifying usability obstacles and validating interface effectiveness from the perspective of first-time users.
- Coordinated formal Usability Testing sessions by preparing test scenarios, observing participant interactions, recording usability issues, and presenting actionable findings for design enhancements.
- Created interactive demonstrations using **Proto.io**, developing realistic interface behaviors that enabled stakeholders to evaluate user interactions before implementation activities began.
- Produced advanced interface animations with Principle, illustrating transitions, micro-interactions, and screen behaviors that effectively communicated intended user experiences during design reviews.
- Utilized **Sketch** to create organized design artboards, reusable interface assets, and detailed screen layouts that maintained consistency across multiple application modules.
- Designed complete interface requirements through Design Documentation, preparing screen specifications, annotations, and interaction guidelines that supported accurate implementation by development teams.
- Evaluated digital products by performing comprehensive **UX Auditing**, identifying usability gaps, interface inconsistencies, and improvement opportunities to enhance overall user experience quality.

Client: DevRabbit IT Solutions, Hyderabad, India

Jun 2017 - Jul 2020

Role: UI Designer

Responsibilities:

- Designed intuitive web user interfaces using **Adobe Photoshop**, creating pixel-perfect page layouts, visual elements, and interface components that aligned with branding standards and enhanced overall user engagement.
- Created high-fidelity application mockups through Adobe Illustrator, developing scalable icons, vector graphics, and interface assets that supported consistent visual communication across digital platforms.
- Produced interactive screen prototypes with **Axure RP**, demonstrating page navigation, user interactions, and functional workflows to facilitate stakeholder reviews before development activities commenced.
- Applied **Color Theory** principles to establish cohesive interface color schemes, emphasizing visual hierarchy, usability, and brand consistency across all user-facing screens.
- Developed low-fidelity wireframes using Balsamiq Mockups, translating business requirements into structured interface layouts that improved design discussions and accelerated approval cycles.
- Built responsive web pages utilizing **HTML CSS**, ensuring semantic page structure, clean markup, and compatibility across multiple browsers while maintaining accessibility standards.
- Enhanced client-side interactivity by developing dynamic interface behaviors with JavaScript, improving form validation, navigation responsiveness, and overall usability without affecting application performance.
- Customized interactive web elements using **jQuery**, developing menus, image sliders, modal dialogs, and user interface effects that provided smooth and engaging user experiences.
- Evaluated interface compatibility through Cross-Browser Compatibility testing, identifying rendering inconsistencies across major browsers and implementing corrective design adjustments for uniform user experiences.
- Performed interface sketching and layout validation with **Microsoft Visio**, documenting screen structures, navigation flows, and page relationships to support clear communication between design and development teams.
- Optimized digital interface graphics using Image Optimization techniques, reducing file sizes while maintaining visual quality to improve page loading performance and overall website responsiveness.
- Maintained reusable design resources within **Adobe Dreamweaver**, organizing project files, updating web templates, and managing front-end assets to support efficient interface development and ongoing maintenance.

EDUCATION:

- **Bachelor of Computer Science Engineering, CIET, Guntur, A.P, India (2013–2017)**
- **Master's in User Experience, Arizona State University, Tempe, Arizona, USA (2024-2025)**
